VOLUME 3, ISSUE 2

FALL 2006

Solar Tour Tomorrow!!!

Come see the Solar Thermal System at 622 Grand Ave on October 7th (10am to 5pm). For more information go to:

<http://www.mnrenewables.org>.

In September 2006 Skally Management had a solar thermal system installed at 622 Grand Ave to provide 75% of the hot water needs for the residents. It is estimated 800 therms of natural gas will not be needed because of the solar thermal heat. You would need 482 mature trees to clean the air pollution generated by this amount of gas of 30 years (9,640 pounds of carbon dioxide generated each year, over 144 tons over 30 years). This system also prevents some mercury from polluting our lakes and streams.

For more pictures and information on the solar thermal system go to:

Solar Tour	1
Fall Reminders	1
Current Availabilities	2
Maintenance	2
Reduce Pollution	2

Important Fall Reminder

Winter is on the way and the heating system has been turned on so:

1. Remove your window Air Conditioners
2. Keep your outer storm windows closed
3. Keep you inner windows closed
4. If it is below 70 degrees outside and your apartment is too hot, do not open your window! This causes the entire building to cool down. Please contact us (651-263-4080) and we can adjust your radiator.
5. If your apartment is below 68-70 degrees please contact us so we can adjust your radiators.
6. If you want your apartment warmer that 70 degrees you need to utilize an electric heater.

Maintenance Requests

This is a reminder about maintenance requests.

If you have an emergency maintenance request please call the number posted at the front door.

If you have a non-emergency request you can:

1. Leave a message on our office phone—651-263-4080
2. Go on the Internet to:
<http://management.skallys.com>
Then click on "Resources for Residents".

We typically respond to non-emergency requests within 1 week. Feel free to contact us if we have not been there within a week.
