VOLUME 2, ISSUE 1

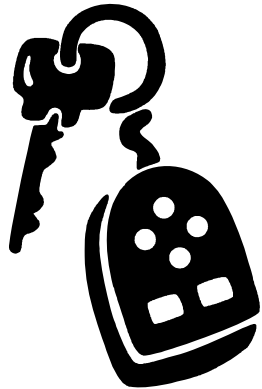

SPRING 2005

Security Update

There have been increased auto thefts in the neighborhood. Here are some tips to prevent auto theft:

1) Always lock your car when you leave it unattended, even if your vehicle is parked in front of your home or alley. CD players, purses, store packages, and other personal items left in plain view in your car can be very tempting lures for "crimes of opportunity".

2) Stow valuables in your trunk if at all possible. Remember that SUVs and van-type vehicles without trunks are especially vulnerable since valuables can easily be seen.

Successful crime prevention requires vigilant awareness

Our website is complete! This is a great way for you to send us maintenance requests (e.g. dripping faucet, outlet not working, water

damage, etc.).

We will continue to update this website with useful information. Feel free to send us your ideas.

of our potential vulnerability and proactive measures to assure safety.

Building Security Tip:

If you don't know the person behind you as you enter the building, don't be afraid to ask to see a key or show them where the buzzer is. It may be awkward but if everyone does it, it will be expected. If everyone is aware of who comes into the building, we will continue to maintain a safe building.

Windsorce, Clean Air Energy

Take a minute to read the windsorce brochure. You can help make the air cleaner in the Twin Cities. It is easy to sign up!

Living Green Expo

Chad Skally is going to be speaking at the 2005 Living Green Expo on Saturday, April 30th. Chad will be speaking about what landlords and residents can do to be more eco-friendly in apartment buildings.

The expo is an annual family friendly event featuring workshops, exhibitors, and activities on green living choices, technologies and issues. The Expo will take place at the Grandstand at the State Fair Grounds.

To find out more info visit their website at <http://www.livinggreen.org/>

Trash Talk

You are more than welcome to throw away large items, but we need to know so that we can charge you accordingly. The cost for larger items is typically \$20-\$30. Let us know by leaving a note in the black box or send us an email.

Skally Management Philosophies:

- We provide safe and secure housing for our tenants.
- We choose not to become commercialized and to keep it a family business.
- We employ on-site caretakers and treat our properties as "home" rather than "business".
- We protect the environment by using eco-management strategies including:
 - providing Eureka curbside recycling containers at each building.
 - re-using office materials like rent envelopes, and recycling printer cartridges.
 - participating in Xcel Energy's wind power program which helps improve the air quality in Saint Paul by reducing coal plant pollution .
 - providing compost bins when possible at our buildings for residents to use and by bringing brush to compost sites.
 - planting native trees and vegetation in areas of our yards.

Spring is here!

Spring is here!
There are several things you should consider as the weather warms up:

- When installing an air conditioner make sure it is secure.
- Now is a good time to go through your stuff and bring items you do not need anymore to the spring cleanup.

- Do not prop the exterior doors to the building open.
- Please help pick up litter around the building as you are coming or going.
- Get out and enjoy the great bike paths on Summit Ave and along the river.
- If you are on the first floor

make sure you do not leave your windows open when you are not around.

- Hit the reverse switch located on your ceiling fan so it blows air down instead of pushing air up.
